

Davis Derby is launching our New Generation 5 Driver Access and Fleet Management System.

The New TruckLOG Generation 5 Driver Access and Fleet Management System offers many new features as well as including those from the previous product generations.

Designed for demanding material handling environments and suitable for the smallest or largest fleets, the New Davis Derby TruckLOG range will tell you everything you need to know about who's driving your trucks - and how. It puts you firmly in control of driver access, pre-operational inspection, and thorough examination of the vehicle and includes driver training and vehicle service schedules.

In addition to existing features, which include Driver Access Control, Shock Sensing and Fleet utilisation enabling lower running and ownership costs, our New products will also offer, via colour touch screen display, fully configurable Pre-Operational checks, Real time messaging and Full Multi-language options. Two way data Transfer, using the latest radio technology and GPRS are available as well as GPS. Data access will be via a browser over the internet, phone PDA etc....
