Metalite Launch Phase 2 of Their New Range of LED Portable Airfield Ground Lighting at inter airport Europe

Munich October 11th-14th 2011

Following the great success and interest in our new range of LED Airfield Lighting, launched at ATC Global earlier this year, we are delighted to announce that Metalite will be attending inter airport Europe 2011 at the Munich Trade Fair Centre, October 11th-14th. Since our product launch at ATC global, we have been working hard to enhance the new range further with additional features and benefits, we will be showcasing these advancements to the Portable LED ground lighting range at the show.

Brian Hunt, Business Unit Manager for Metalite Aviation Lighting states 'This is a very exciting time for us, we were completely bowled over, not only by the interest we received at the launch of our new LED product range, but also by the huge number of enquiries we've received since the show. Customer's are aware of the significant benefits LED lighting now provides them. The greatly extended operating run-times available thanks to our highly efficient optical design, combined with reduced running costs and high build quality, makes this range of lights a worthy long term investment for any airstrip, large or small.'

Our new LED portfolio will be on display on the British Pavilion (Hall B6) stand 676 at the Munich Trade Fair Centre. Our team would be delighted to see you at our stand to introduce the new products, along with highlighting the business benefits of investing in LED Portable Airfield Lighting for a whole host of applications, we look forward to meeting you there!
