

PRESS RELEASE

January 2012

SYSTEMS INTERFACE AWARDED VCCS REPLACEMENT CONTRACT AT BELFAST INTERNATIONAL AIRPORT

Systems Interface, based in the UK, has been awarded a major contract for the supply, design, installation and commissioning of a replacement Voice Communications Control System (VCCS) at Belfast International Airport, Aldergrove, Northern Ireland.

Contracts have been signed between Abertis Group and Systems Interface for the provision of a Frequentis 3020X Voice Communication Control System (VCCS). Also included will be the installation of a Kettel Emergency Voice Communication System (EVCS), a Landing Clearance Indicator System (LCIS), a Status System, and a Crash Alarm. Completion of installation will be September 2012

Belfast International Airport handles over 4 million passengers a year flying to over 45 destinations in 17 countries.

About Abertis Group

Belfast International Airport forms part of **Abertis** an international group which manages mobility and telecommunications infrastructures across three business areas: toll roads, telecommunications infrastructures and airports. As a result of continuous international expansion in the company's activities the Group now operates in 15 countries on three continents.

Abertis Airports holds stakes in 30 airports in 9 countries with a global traffic in excess of 80 million passengers a year. After the acquisition of dca, Abertis Airports became one of the largest operators in the world with a notable presence in Europe and America.

About Systems Interface

A leading project based aviation systems integrator with many years specialist experience delivering turnkey projects to civil and defence airports and Civil Aviation Authorities worldwide.

Systems Interface manages complex logistical and technical requirements, sourcing and supplying fully integrated bespoke ATC systems, navigational aids and airfield lighting, designed, installed and commissioned to exacting requirements.

Services include system design, upgrading existing Air Traffic Control Systems, completely new turnkey installations, safety cases, training and maintenance and civil works. A dynamic project based organisation with a proven track record for delivering complex projects on time and in budget.
